Overall, we are spending less than 300 dollars per student in assistance thru book, bronze (Partial) scholarships, and special honors assistance; which makes up 91 percent of the recipients. On the hand, we spend an average of \$1500 for the other 7% in the Gold and Silver Scholarships.

Can we draw some conclusions from the data presented whether this program is effective and fulfilling mission? What measures are we going to use? Is it mainly the numbers supported? Perhaps, we need more data and can only come from the Medical School like:

- The number of recipients who have gone on to graduate on time
- The number of recipients who passed the boards on first take
- How many of the recipients made it to the top 10 in the national boards
- How many of the Gold and Silver Scholar recipients made it to the top 10 in the national boards?
